Containers to suit you

Wherever possible the best approach to a project is to allow enough time for proper planning. By giving us enough time to contract grow your plants for your scheme, you get:

- The full pallet of plants at the best possible specification.
- Availability for delivery on time at the most,
- Cost effective way of procurement for the budget.

This schedule gives an indication of the lead in time required for contract growing shrubs. Different varieties may take less growing time to achieve specification and, of course, we cannot guarantee ideal weather. Perennials, depending on varieties, are generally much quicker to produce.

Lead schedule indicating the growing time and planting times for 10L, 5L and 3L plants.

Select the month you require your plants to be ready for and follow the coloumn down to the month that they need to be potted in.

If you have any concerns about the timing for a particular project please don't hesitate to contact us.
