

Illington a pictorial journey

Hall Farm Illington – the new nursery – from this we planned and created a new high –tech production site – the task ahead seemed almost insurmountable at this stage

Work begins in spring 2003 with levelling, drainage and the first multispan

The first beds are laid out and potting can begin

robin tacchi plants

Using a mobile potting machine,
and conveyors with 5 operatives up
to 20,000 plants potted per day
500,000 containers in 25 days

First year's production
